

Our Cookies Policy

Cookies

We use “cookies” to help you personalise your online experience. A cookie is a text file that is placed on your hard disk by a Web server. Cookies are not used to run programs or deliver viruses to your computer. Cookies are uniquely assigned to you, and can only be read by a Web server in the domain that issued the cookie to you. One of the primary purposes of cookies is to provide a convenience feature to save you time. The purpose of a cookie is to tell the Web server that you have returned to a specific page. For example, if you personalise pages on our Website, or register for the Subscription Service, a cookie helps us to recall your specific information on subsequent visits. When you return to the same Website, the information you previously provided can be retrieved, so you can easily use the customised features.

You have the ability to accept or decline cookies. Most Web browsers automatically accept cookies, but you can usually modify your browser setting to decline cookies if you prefer. If you choose to decline cookies, you may not be able to fully experience the interactive features of the pages you visit. Amplius uses cookies for Google Analytics and may use them for remarketing.

Clear Gifs (Web Beacons/Web Bugs)

We employ a software technology called clear gifs (a.k.a. Web Beacons/Web Bugs), that help us better manage the Website and Subscription Service by informing us what content is effective. Clear gifs are tiny graphics with a unique identifier, similar in function to cookies, and are used to track the online movements of Web users. In contrast to cookies, which are stored on a user’s computer hard drive, clear gifs are embedded invisibly on Web pages or in emails and are about the size of the period at the end of this sentence. We use clear gifs in our HTML-based emails to let us know which emails have been opened by recipients. This allows us to gauge the effectiveness of certain communications and the effectiveness of our marketing campaigns. We tie the information gathered by clear gifs in emails to our customers’ Personal Information. If you would like to opt-out of these emails, please see “Opting Out and Unsubscribing”.

Flash Cookies and Other Third Party Tracking Technologies

The Adobe Flash Player (and similar applications) use technology to remember settings, preferences and usage similar to browser cookies but these are managed through a different interface than the one provided by your Web browser. This technology creates locally stored objects that are often referred to as “Flash cookies.” Catalyst does not use Flash cookies.
